Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Belanger proposed amending the claim to specify that the seat is coupled to the stem thereby eliminating rotation of the seat relative to the stem. It was indicated that his limitation would not render the claim allowable over Degen. It was indicated that Degen shows seat (4) coupled to stem (5) and that there is no rotation of seat (4) relative to stem (5). Mr. Belanger argued that member 5 of Degen is not a stem, however this argument was not considered persuasive. No agreement reached.
